Welcome to NCHHW 2018

Dear Friends,

With the changing era, the current health system is changing its focus from the traditional biomedical model to a holistic health oriented model. The holistic health oriented system is based on the enhancement and maintenance of health, not on the cure of disease. Holistic health is actually an approach to life. The goal is to achieve maximum well-being, where everything Rather than the very best that is possible. With Holistic Health people accept responsibility for their own level of well-being, and everyday choices are used to take charge of one's own health. Here people can access an array of holistic resources and services, all designed to provide an individually customized map to health optimization using the best natural supports.

In India, holistic health care should be adopted at every level of health system so that individuals should be encouraged to engage in self-care and aware about their health. This conference will be an excellent platform to present holistic health as an interdisciplinary approach. The 3 day academic and technical feast will provide various expertise to discuss their views and experience for achieving holistic health. Various delegates from all over the country will share their ideas, newer concepts and innovations in this field. Through this conference, whole country will be covered one umbrella to provide holistic health care services to every individual so that it urges them be an active participant in their prevention, treatment and health care, rather than giving all the power to a health care provider.

We are very pleased to invite you to participate in the 1st **National Conference on Holistic Health & Wellness (NCHHW 2018)** to be held at New Delhi, India from 22-24 March, 2018, with the theme of **Unifying Body, mind and spirit**, which is also in tandem with the initiatives taken by the Govt. of India "Mainstreaming AYUSH and Universal health coverage".

The conference intends to provide the requisite platform to all the participants to present their research, exchange the ideas, networking and develop memorable professional friendships.

March month of the year being a good time to be in Delhi, and in North India. Pleasant weather will add to the taste sensualising northern Indian Cuisine. Do spare a day or two to roam around the historical city of Delhi with many monuments or visit one of the Wonders of World, Taj Mahal at Agra, just 200 km from the conference venue.

Again we extend a very warm welcome to you all.

Dr. Jugal Kishore

Chairman Organizing Committee
